Nothing Escapes Our Aviation Security Badge Management Solution

Integrated Enrollment:
The enterprise solution for
easily and accurately
issuing and tracking
aviation security badges

Streamline your badge management system while ensuring the highest levels of aviation security standards. Integrated Enrollment is your solution for improving workflow processes, assuring compliance to applicable TSA security directives, and improving tracking and required reporting.

Integrated Enrollment is a flexible and scalable solution that is easily integrated with your new or existing hardware systems, including smart card encoding and biometrics, providing one seamless process that enables you to:

- Fingerprint and populate applicant demographics across an integrated system
- Automatically submit badge applicant data for TSA and FBI approval
- Schedule and document required training
- Generate a personalized smart card and define and activate access control
- Easily and accurately track and report for ancillary system, such as time and attendance and parking
